Privacy Design Patterns and Anti-Patterns

Patterns Misapplied and Unintended Consequences

Nick Doty & Mohit Gupta

UC Berkeley, School of Information
Privacy-by-Design … in practice

- for designers and developers of technologies
- document and share techniques, rather than normative requirements
Mark the neighborhood, above all, by gateways wherever main paths enter it—main gateways (53)—and by modest boundaries of non-residential land between the neighborhoods—neighborhood boundary (15). Keep major roads within these boundaries—parallel roads (23); give the neighborhood a visible center, perhaps a common or a green—accessible green (60)—or a small public square (61); and arrange houses and workshops within the neighborhood so that they come together in some typical arrangement.

And again, make the house an individual piece of territory with its own garden, no matter how small—your own home (98)—make the main room essentially a kind of farmhouse kitchen—farmhouse kitchen (139), with alcoves opening off it for eating, working, bathing, sleeping, dressing—bathing room (94), window place (180), workspace enclosure (183), alcove (188), dressing room (189); if the house is meant for an old person, or for someone very young, shape it also according to the pattern for old age cottage (155) or teenagers’ cottage (154). . . .

Fire Eagle would like to check with you every so often to make sure you’re still comfortable sharing your location. You can ask us not to check with you at all if you’d prefer...

How often should we check with you about sharing with Fire Eagle?
- Check with me once a month
- Check with me once every 3 months
- Don’t bother checking with me at all
